

Calgary's Local Data Groups, 1st Edition – Summary

Alberta Data Architecture (ADA) planned a special meeting on Wednesday, **September 12th, 2018**, to introduce a variety of local special interest groups that focus on, or at least touch upon, all things data. Thirteen SIGs accepted our invitation to pitch their organizations and offerings.

This was an ideal opportunity to see what these groups are all about, and to network with like-minded professionals. In addition to ADA, we learned about: ARMA, ASQ, CAMUG, CIPS, CNGM, DAMA, Data for Good, DMC, IIBA, PPDM, PyData, R and SQDG.
